JOURNAL OF INFORMATION & OPTIMIZATION SCIENCES

Index of Volume 32 (2011)

Number 1, January

A. Vlachos, I. Petikas and S. Kyriakides : A Continuous Ant Colony (C-ANT) algorithm solving the Economic Load Dispatch (ELD) Problem 1–13

T. T. Wang, K. H. Yu, Y. D. Lee and Y. Mclee : Mapping the intellectual structure of decision analysis research in 1966-2007: An author co-citation analysis 15–33

T. T. Wang, K. H. Yu and Y. D. Lee : Identifying the critical themes of new product development research from social network perspective 35–55

F. M. Liu : A theoretical model of firm heterogeneity, FDI, and optimal technology strategy 57–74

K. L. Hou and L. C. Lin : Investing in setup reduction in the EOQ Model with random yields under a Limited Capital Budget 75–83

K. J. Chung and S. D. Lin : The simplified solution procedure for a replenishment policy with defective products, backlog and delay of payments 85–91

T. C. Chiang and F. J. Yu : Improving real estate broker service quality via TOPSIS and AHP 93–107

P. T. Artikis, C. T. Artikis and K. Agorastos : Stochastic discounting for cost effective replacements of systems under competing catastrophic risks 109–120

C. K. Mao, J. L. Hu and C. M. Chen : Are the fixed-mobile telcos more competitive? A cross-country efficiency study 121–147

C. H. Chang : The impact of welfare on wage rate, market work hours and income—an empirical study 149–158

C. H. Chang, P. J. Lee and J. S. Lan : The effects of interest rate and exchange rate risks on unemployment 159–168

W. H. Wu, C. T. Lin, K. H. Peng : Compare strategy of different hospitals on the global budget system 169–187

S. C. Huang, C. W. Lee, M. J. Chang and T. K. Wu : Using supervised kernel locality preserving projections to improve classifier performance on credit rating forecasting 189–204

K. J. Chung and S. D. Lin : A complete solution procedure for the economic order quantity under conditions of a one-time-only extended permissible delay period in payments from the viewpoint of logic 205–211

C. H. Wang, P. C. Chen and H. C. Huang : Health care efficiency and determinants—A comparison of Taiwan and OECD countries 213–231

P. C. Wang and W. Fang : Improved grey discriminant analysis 233–243

C. H. Hung and C. H. Hsu : Physical fitness indices for data with non-normal distribution 245–254

Number 2, March

L. Y. Huang and S. C. Huang : Optimal forecasting of option prices using particle filters and neural networks 255–276

M. C. Chiu and J. H. Win : Wall plug-in power supply system for a robotic vacuum cleaner 277–295

M. C. Chiu : Path-planning for an autonomous robot using a simulating annealing 297–314

P. C. Jha, D. Kumar, P. K. Kapur and M. Saraj : Allocation policy for testing effort of modular software system under budgetary constraint 315–337

S. C. Huang, T. H. Pan and N. Y. Wang : Risk-sensitive optimal exercise strategies of R&D projects under oligopoly competition 339–368

C. H. Wang and H. P. Chuang : Integrated on-line and off-line quality control for products with destructive testing 369–380

S. C. Huang, N. Y. Wang and M. H. Huang : Pricing multivariate options under stochastic volatility lévy processes 381–410

Y. C. Weng : Research on the environmental load of kinmen tourism—The application of ecological footprint method 411–418

W. H. Lin, C. T. Lin, H. F. Chang and H. S. Chang : Financial performance of non-profit hospitals in Taiwan 419–431

T. Y. Lin and Y. H. Chin : A two-warehouse inventory model for items with imperfect quality and penalty costs under screening errors 433–450

C. C. Lee, T. T. Lin and M. C. Lin : The correlation between mutual fund managers' personal attributes and operational behaviour characteristics and fund performance 451–460

S. C. Huang : Term structure of credit spreads with learning and anticipation effects 461–491

G. J. Lai, M. C. Chiu, Y. Kobayashi, L. J. Yeh and C. L. Lin : A study of design parameters for a type of stirling engine 492–506

Number 3, May

A. S. Lee, W. C. Su, Y. L. Lao, C. R. Ho and Q. H. Chui : A study on furniture design by CAD/CAM- A case study of KD magazine stands 507–525

Y. M. Li, C. Y. Yang and S. H. Hung : Research on the effect of boutique motels' environmental facilities and consumers' individual preferences in pursuits of new sensation on their overnighting intentions 527–550

T. P. Kuo and C. Y. Yang : The study of consumer intention, service quality cognition and repurchase behavior of consumers in exotic restaurants – mexican restaurant 551–560

C. L. Tsai, Y. C. Wang and H. J. Chou : A study of 19-years tourism management (1991-2009) 561–572

P. Y. P. Li and F. J. Wang : Effects of human resource staffing strategies on organizational performance in catering industry 573–585

J. F. Chang : Comparison of DPEI based on PSO and GA for constructing fund of funds 587–603

C. H. Lin : Industry-specific competitiveness of a nation and its consequence on overseas marketing performance: Measurement construction and empirical study that follows porter's diamond model 605–620

F. J. Wang and P. Y. P. Li : Nurturing contract food services cook–The fundamental competencies assessment of HACCP certified school lunch contractor 621–635

P. Y. Huang, C. C. Wang, Y. Y. Tseng and R. J. Wang : The impact of curriculum design on learning satisfaction 637–655

P. Y. Huang, C. C. Wang, Y. Y. Tseng and R. J. Wang : The impact of brand equity on customer's purchase intention – Taking perceived value as a moderating variable 657–672

Y. J. Lee : Realistic effect evaluation of image compositing technique on texture colors of the sofa 673–683

S. P. Yeh : The effects of fairness perception of performance appraisal on psychological contract and organizational citizenship behavior 685–696

H. C. Chen, Y. W. Chang and R. C. Hwang : A watermarking algorithm 697–707

H. H. Lai : Study on influence of labor management relations on operational performance 709–728

P. F. Chao : A study of the relationships between work values and creativities across different generations 729–748

Y. D. Lee and H. C. Lin : Leisure motivation and life satisfaction: Test of mediating effect of leisure benefit 749–761

W. C. Kuo, S. H. Kung and C. Huang : Order picking algorithms for a two-carousel-single-crane automated storage and retrieval system 763–776

Number 4, July

C. W. Chang, D. J. Horng and H. L. Lin : Combing fuzzy theory and analytic network concept to construct a model in management decision-making 777–798

H. Y. Tsao and P. C. Lin : Relative influence of purchase feedback and nonfeedback effects on market share—based on the first order markov brand switching model 799–810

Y. C. Weng : Horizontal mergers mode and controlled policy 811–825

C. K. Chen : Intellectual property licensing and value creation of culture industry 827–844

C. K. Chen : Cross nation analysis on culture industry and intellectual property 845–862

Y. J. Lai, L. J. Yeh and M. C. Chiu : A study of mechanical property for a type of shape memory alloy 863–875

C. J. Jan and S. T. Wang : Integrating grey multiple-attribute decision and delphi methods to improve the organization of international activities of university departments (graduate institutes) –with a department (graduate institute) in a national institute of technology as an example (R.O.C.) 877–888

C. H. Liu : Metaheuristic scheduling of parallel machines with job delivery coordination 889–907

R. J. Lin, C. C. Wei, H. W. Chang and C. S. Wei : A model for selecting a new product development project portfolio 909–927

M. C. Yu : A soft time-windowed mechanism for vendor selection model 929–944

C. J. Huang and M. A. K. Chung : Associating grey relation and cluster analysis to perform financial characteristic study on enterprises in China 945–957

C. T. Cheng, S. L. Lo and T. T. Lin : On the decision of chlor-alkali process retrofit under environmental uncertainty: A real options approach 959–971

G. Chondrokoukis and Y. Karafyllis : An e-procurement system for Hellenic public hospitals 973–985

K. S. Hsu and T. S. Lan : Optimization of tool wear ratio for automation computer numerical controlled system 987–996

G. F. Yen, S. D. Lin and K. J. Chung : A note on the optimal manufacturer's policies in the EPQ model under two levels of trade credit policy 997–1004

Number 5, September

Y. L. Wu, C. Y. Chiu, Y. M. Cai and J. L. Jia : Performance evaluation of knowledge platform for children education institutions 1005–1024

W. C. Tsai : Vendor quality performance rating based on measure of dominance 1025–1037

M. C. Chiu : The numerical assessment of path planning for an autonomous robotic vacuum cleaner using an ant colony optimization method 1039–1058

K. H. Hsu, Y. F. Huang, H. F. Chen and Y. C. TU : Using easy methods to derive an integrated vendor-buyer inventory system under shortage allowed 1059–1064

T. C. Chu and C. C. Chen : Application of a fuzzy MCDM method to the evaluation of operating systems of smart phones 1065–1080

K. H. Hu and M. C. Chang : Applying risk appetite to efficiency estimations: The case of Taiwan banks 1081–1091

Y. C. Huang, S. N. Hu, K. H. Wang and C. T. Tung : Optimal replenishment schedule and pricing policy for hybrid retailers with continuously decaying demand in time and price 1093–1113

T. C. Chiao : Construction of business competition analysis and decision-making model of retailer stores by lanchester's law and AHP 1115–1124

P. W. Ling : The comparative study between moving average method and fractals theory for prediction of stock price behavior in Taiwan 1125-1133

C. Y. Chiou, S. H. Chou and C. Y. Yeh : Using fuzzy AHP in selecting and prioritizing sustainable supplier on CSR for Taiwan's electronics industry 1135–1153

Y. Wang, Y. F. Huang, M. L. Shyu and H. C. Lee : Using kano's model to explore the wait service quality of THSR 1155–1174

K. H. Hsu, Y. F. Huang, Y. C. Tu and P. C. Chen : Using cost comparison method to determine retailer's ordering decision under dependent delay payments period 1175–1183

P. L. Chou, C. C. Chang and J. J. Lin : A note on momentum and contrarian strategies across price limit regimes: Evidence from China's A-share market 1185–1199

L. M. Chuang, C. C. Liu, W. C. Tsai and C. C. Yang : A typology and assessment of human resources performance in the financial services industry: The human resources scorecard perspective 1201–1217

C. H. Chang and W. Che : A empirical study of changes in international crude oil spot price relationship between Taiwan stock prices 1219–1227

J. Y. Huang and P. C. Tsai : A novel approach for determining the order quantity of perishable items 1229–1252

Number 6, November

Y. S. P. Chiu, C. H. Lee, L. W. Lin, Y. C. Lin and C. K. Ting : Solving production lot size problem with an improved delivery policy and failure in rework by a simplified solution procedure 1253–1258

K. Zhao : Two types of path structures of graphs 1259–1268

H. H. Lin and D. Y. Sha : A new particle swarm optimization for multi-objective open shop scheduling 1269–1287

R. Riccardi and R. Toninelli : Data envelopment analysis with outputs uncertainty 1289–1314

L. Zhang and Y. Xu : A full-step interior-point algorithm for linear complementarity problem based on a simple function* 1315–1332

Y. C. Tu, Y. F. Huang, W. K. Chen and H. F. Chen : Using simple methods to derive EOQ and EPQ models with shortage and imperfect quality 1333–1340

J. T. Wei, K. Y. Kou, J. S. Lin and H. H. Wu : Using feature selection in identifying critical factors of injury severity 1341–1352

P. F. Hsu, H. Y. Chiang and C. M. Wang : Optimal selection of international exhibition agency by using the delphi method and AHP 1353–1369

W. Moudani, A. Shahin, F. Shakik and F. M. Camino : Dynamic programming applied to rough sets attribute reduction 1371–1397

S. D. Lin and K. J. Chung : An algorithm to compute the integrated production policy of an imperfect item for vendor and buyer 1399–1407

T. C. Chiao : The correlation between the firm's export orders and operational performances for semiconductor manufacturing Factories in Taiwan 1409–1416

S. W. Chiu, J. C. Yang, C. C. Huang and K. W. Chiang : A two-phase approach for jointly determining the lot size and delivery policy in a vendor-buyer integrated system with rework 1417–1423

W. M. Jeng, M. C. Yu and Y. H. Liao An iterative vertex coloring algorithm for vehicle routing problems with soft time windows for reverse logistics 1425–1442

Index of volume 32 (2011) 1443–1449
